EDUCATION

Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology B.E. Computer Science and Engineering — CGPA: 7.80	07/2023 – 06/2027 Mumbai, India
Sanjay Ghodawat University HSC — Percentage: 72.67%	04/2021 – 03/2023 Kolhapur, India
Kini Highschool Kini SSC — Percentage: 95.80%	2021 Kolhapur, India
Pearl Academy Minor in UI/UX Design	2024 – Present Mumbai, India

PROJECTS

DeepGrade AI — Intelligent Answer Evaluation Platform

- Designed and developed a hybrid AI system automating answer sheet evaluation using OCR, semantic similarity (SBERT), and LLM-based reasoning (Mistral AI).
- Implemented end-to-end pipeline from PDF extraction to scoring and feedback generation with a modern SaaS-style dashboard.
- Tech Stack:** OCR, SentenceTransformers, FastAPI, Mistral AI, React, Tailwind CSS

AgroNexis — AI Powered Eye for Plant Health

- Developed an AI-powered system detecting plant diseases from leaf images using a CNN model and suggesting remedies to farmers.
- Users upload plant images via a web interface; the model classifies disease type and provides expert-verified treatment suggestions from a knowledge base.
- Tech Stack:** TensorFlow/Keras, OpenCV, Flask, HTML/CSS, MySQL

ChatSphere — Real-Time Chat Application with Microservices

- Built a production-grade real-time messaging platform with microservices architecture deployed on AWS.
- Implemented full DevOps pipeline with Docker containerization, Jenkins CI/CD, Terraform IaC, and Ansible configuration management.
- Features WebSocket-based instant messaging, JWT authentication, and cloud media storage.
- Tech Stack:** React.js, Node.js, Socket.io, MongoDB Atlas, Docker, Jenkins, Terraform, Ansible, AWS EC2, S3

PublicPulse — Intelligent Complaint Routing and Analytics Platform

- Developed a full-stack AI-powered grievance portal that automatically classifies Hinglish and English complaints, assigns departments, predicts priority/sentiment, and tracks complaint resolution.
- Implemented NLP-based complaint classification and duplicate detection using Transformer-ready pipelines, TF-IDF vectorization, and cosine similarity for efficient grievance management.
- Tech Stack:** Python, FastAPI, React, Tailwind CSS, MongoDB Atlas, Scikit-learn, Hugging Face Transformers, PyTorch, JWT Authentication

COURSEWORK

Data Structures & Algorithms | Operating Systems | Database Management System (DBMS) | Artificial Intelligence (AI) | OOP Concepts | Web Development

TECHNICAL SKILLS

Languages: C, Java, HTML, CSS, JavaScript

Developer Tools: VS Code, Jupyter Notebook, Figma

Technologies: Linux, Node.js, Git, GitHub, React, FastAPI, Docker

Databases: SQL, MySQL, MongoDB

POSITION OF RESPONSIBILITY

Teaching Assistant — Dr. B. N. Chaudhari Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology, Mumbai	Aug 2024
- Guided students in learning the basics of Python and JavaScript. - Installed and updated software on campus devices and suggested tools for the IT department.	

EXTRACURRICULAR

- Participated in inter-school kabaddi tournaments, strengthening leadership, communication, and team coordination.
- Completed a Scout course, demonstrating leadership abilities and commitment to community service.
